

COMPONENTS TOOLS REQUIRED Active 4, 6 or 8 Bracket Cover A SCISSORS Qty: 4, 6 or 8 Bracket Cover B

INSTALLATION NOTES

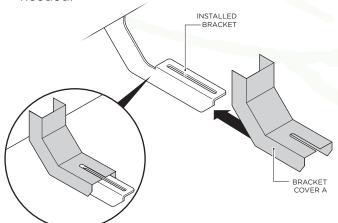

NOTE: Bracket Cover quantity will vary depending on the SKU you purchased. Each Bracket Cover is 2 pieces (Bracket Cover A & B)

NOTE: If you have already installed your steps you will first need to remove the steps to install the Bracket Covers.

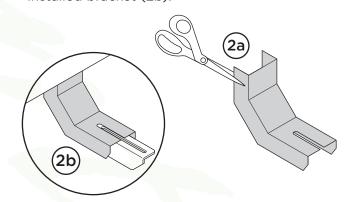

NOTE: Minor trimming may be required for desired look and fit.

NOTE: Bracet Covers will not cover up additional supporting braces on some applications. They are designed to cover the main bracket.

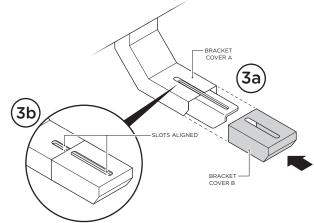

1. Place (1) Bracket Cover A onto the installed bracket to identify if there is any trimming needed.

2. If trimming is necessary, carefully trim the Bracket Cover using scissors or a knife until you reach your desired look and fit (2a). Once this is complete, place the Bracket Cover A onto the installed bracket (2b).

3. Place (1) Bracket Cover B over the end of Bracket Cover A (3a). Next, align the slots in the Bracket Covers with the holes in your bracket (3b). Repeat steps for all of the remaining brackets for the Driver & Passenger side.

4. After the Bracket Covers are in place, fasten the Driver Side & Passenger Side Running Boards to the Brackets by using the hardware specified in your installation guide.
